State of Tennessee

Commercial Laboratories Approved for Drinking Water Analyses

Section 1200-5-.14 of the Regulations states that for the purpose of determining compliance with the regulations regarding maximum contaminant levels, samples may be considered only if they have been analyzed by a laboratory certified by the Department.

The Department has given approval for the following laboratories to provide the analyses of certain contaminants as designated. Please pay close attention to the laboratory Expiration Dates. Analyses WILL NOT BE ACCEPTED from those laboratories whose certifications have expired !

Contaminants:

- a = Inorganics, Metals; b = Nitrate and Fluoride; c = Pesticides; d = Herbicides; e = Trihalomethanes; f = Volatile Organics**; g = Sodium and Corrosivity; h = Radiochemistry; i = EDB / DBCP; j = Vinyl Chloride; k = Lead and Copper; l = Dioxin; m = Asbestos; n = Bacteriologicals; o = Turbidity; p = TOC

Note If you need to do complete inorganic testing, you must use a laboratory certified for both a and b contaminant groups. If you need to do a complete organic testing, you must use a laboratory certified for both c and d contaminant groups.

Any questions concerning this list should be directed to the Laboratory Certification Officer at (615) 532-0191.
